

# **Cave Rescue Information**

**What to do:** Since you have a copy of this paper, you have been selected to be the link to the surface for those that are venturing into the cave. We will call prior to entering the cave to let you know when we will be exiting the cave. Wait 2 hours after due out of cave to call for help. Often the mountains block cell phone coverage and we cannot always call right away. Keep trying to call our cell phones instead. Leave a message to have us call you.

We've never needed to be rescued, but we are always going in prepared. So just in case, here are the phone numbers to both the cave rescue team as well as the State Police.

## **Eastern Region Rescue Information NCRC**
